# Snakky Max

A  
energy  
rated

**SNAKKY MAX** allows a complete refreshment service offering a choice of snacks, confectionery, cans and bottles and even fresh food products. As you would expect from Necta, the Snakky Max is the operator's dream, as replenishing stocks couldn't be simpler, with pull out trays which tilt to allow easy access. To ensure client satisfaction, the Snakky Max has a sensor in the delivery area which detects if a product has actually been vended. Designed to sit alongside the similarly sized Kikko Max in order to provide a full refreshment service, Snakky Max can also be banked with Opera, working in master/slave mode.

### TEMPERATURE

- Uniform (5-8°C)
- Varied: 10-15°C in the trays and 5-7°C (or 4°C in food versions) lower trays with operating conditions of 32°C.

### ELECTRONIC CONTROL

- 16-bit electronic control with incorporated Flash EPROM
- Automatic setup and reading of statistics with Giga application or Up-Key

### PAYMENT SYSTEMS

- Payment systems and electronic board located in a separate compartment with independent access
- Possibility to install up to three payment systems at the same time (Executive or MBD protocol)

### ACCESSORIES

- 5 direct selection buttons (standard on some versions)
- Vend detector system kit (standard on some versions)
- Kit to block dispensing compartment (standard on some versions)
- Coin box cover kit
- Wall mounting bracket kit

### ENERGY CONSUMPTION

Snakky Max is an environmental friendly vending machines thanks to "green" features such as:

- Energy Management software
- LED lighting
- Perfect insulation of the cell

Thanks to these features Snakky Max has obtained the energy class rating A according to EVA EMP 3.0.
